Dojo

Antoni Arola

“Ever since I was small, I have been fascinated both by gardens and lamps, so this union was a real challenge. Perhaps the contrast with the plant shapes led me to design a very rational and clean object. A cube formed by louvers. I don’t remember how it happened, but the influence of admirable traditional Japanese architecture is evident in this project. Not for nothing are they grand masters interrelating architecture and gardens. **Dojo** —place where Zen Buddhism is practiced— is a part of a collection originally called Ishi Doro, meaning ‘garden lantern’ in Japanese”. It won an ADIFAD Silver Delta award in 1999. **Antoni Arola** designed it especially for outdoors, with materials treated to resist the weather, although it can also be placed indoors and occasionally be used as table or stand function. This ambiguity of the light fixture has encouraged us to update it, to adapt it to different environments and give it greater personality, with new finishes added to the classic extruded aluminium finish and which are characterised by the absence of colour: white, rust and gold.

Antoni Arola (Tarragona, 1960)

is and interior and industrial designer who won the Premio Nacional de Diseño (National Design Award) in 2003. A lighting specialist. Few professionals have his experience in this field. And he never repeats himself. His secret is simple; working with light to design a bespoke light fixture. And observing. He is able to see a perfume bottle in a river stone and the warmth of a unique lamp shade in an ostrich egg. It was precisely the Ou d'en Sandy fixture, designed for Metalarte in 1998, the same year as Dojo revealed his singular personality.

Dojo

Technical information

Dojo Gr

Dojo Me

Outdoor light fixture. Structure formed by extruded anodised aluminium grills and an iron lid. Available in four finishes: brilliant gold, silver, white and rust brown. It includes fixtures for surface mounting and for concrete footing. It also incorporates a fastening system and electrical connections.

Design by Antoni Arola

**Methacrylate opal diffuser.
Weatherproof protector made of
translucent injected polycarbonate.**
